Re: Product Discontinuation Notice

Dear UDT Instruments Customers and Distributors:

The purpose of this letter is to communicate recent product decisions that have been made concerning UDT Instruments models S370, S380 and S390.

Effective November 1, 2009, the S370, S380 and S390 have been officially discontinued. UDT Instruments will continue to support recalibrations of these instruments and will perform repairs as parts are available.

The direct replacement for the S370, S380 and S390 is the flexOptometer, which comes in 3 models S470, S480 and S490. Details on the flexOptometer can be found on our website. The flexOptometer continues UDT Instruments line of high quality, laboratory-grade optometers, meeting or exceeding all performance levels of its predecessors while adding many modern features to the instrumentation.

Sincerely,

Eric Nelson
